

Y12 Biology Summer Homework

There is surely no more enjoyable way to spend your summer than slumped in front of a computer screen reading kerboodle. So, to make sure that you make the most of your break, please complete the following tasks and bring to the first lesson of year 13!

This is a good few hours work so I would not advise leaving it to the very last day of the holidays.

1. Make notes on pages 204 - 216 from kerboodle. This is pretty straightforward stuff that we will not be covering in detail in class.
2. Summarise your notes in the form of a mind map, flashcards or another method that works for you.
3. Answer the application questions entitled 'competing to death on page 212 - 213.
4. Complete the questions on pages 215 - 216 on Canadian Lynx and Snowshoe Hares.

Bonus optional homework

If you intend to study a scientific subject at university or are aiming for As in your exams you need to start reading beyond the spec. We have a small library of Biology books in S017 which you are welcome to borrow over the summer. There are some fascinating and eye-opening books on Biology that lots of you might enjoy, but please don't get sand on them.
