

CHEMISTRY

Minimum entry grades: minimum grade 66 in combined science or grade 6 in GCSE Chemistry; grade 6 in Maths.

The fascinating world of Chemistry is an exciting place to be. The knowledge students will learn is cutting edge, and the skills they will become proficient in will hold them in good stead regardless of their future career.

Why study it?

If you are intrigued and excited about studying everything around us, known as matter, and how it behaves then this is a course you will enjoy.

Science seeks to explain how the world works at a molecular level. Chemistry is a course for the curious!

This subject is for you if...

- You are motivated, organised and enjoy a challenge.
- Your interest in science is such that you will happily read around topics outside of lessons.
- You will thrive off of the quick pace of the course.

Where can it lead you?

Chemistry A-level provides students with the knowledge to access most of the wide variety of degrees in the sciences.

Careers: chemical engineering, environmental sciences, geological sciences and forensic science to name but a few. The analytical skills developed in this course are widely applicable.
