

## Achievements in the Mathematics Curriculum

Members of the department are involved with various local maths development opportunities. This provides students with early knowledge of local and regional opportunities, this includes Royal Institute Maths Masterclasses, run on Saturday mornings.

Good learning behaviours, at all levels of attainment, are celebrated by being used as exemplars around the department for other students to learn from. Some examples attached [here](#).

In KS5 we work with local engineers to provide an opportunity for A-Level students to join the Engineer Education Scheme and compete in a national competition at the end of the project.

Aspirational role models are powerful motivators for all students and we are excited to promote our Sixth Form leavers as just such people. Extremely accessible for our students to relate to, we use these as displays within the department. Some examples attached [here](#).
